

EVA DESIGNING PROCESS

Cosmic Team

Design workflow

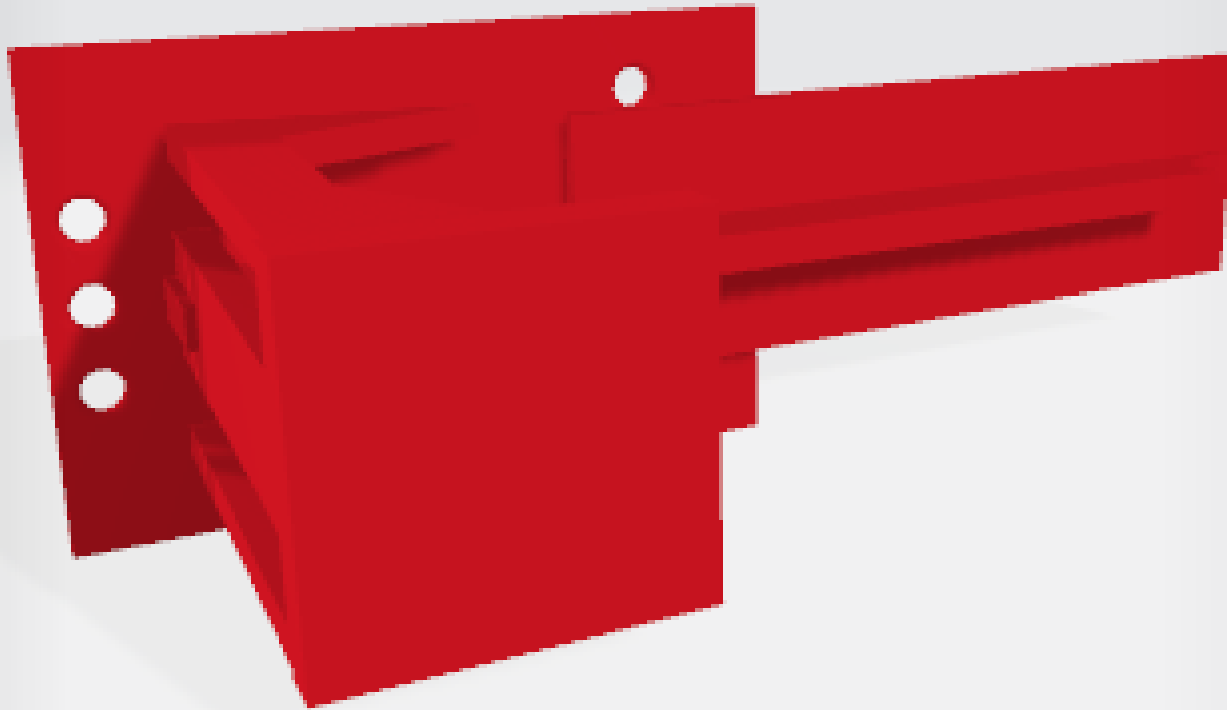

This [link](#) help to assembled EVA Robot.

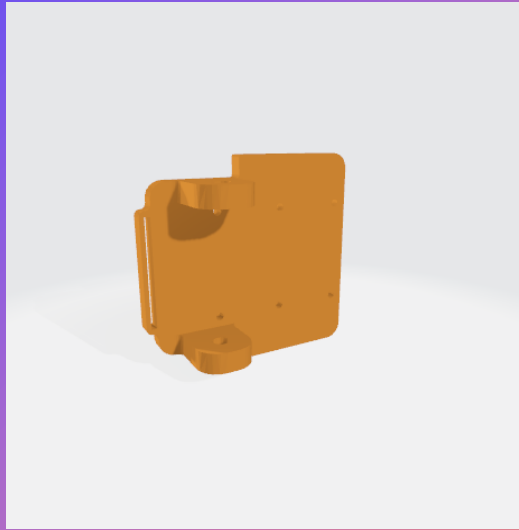

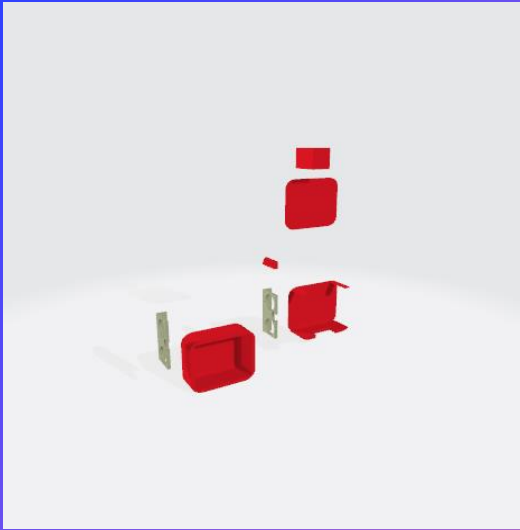

Bring 4WD RC Smart Car

- The vehicle chassis has stands , a dc motor , and servo motor for steering , it can be ordered from specialized places
- This [link](#) help to assembled it.

DESIGN AND PRINT ARDUINO MEGA HOLDER

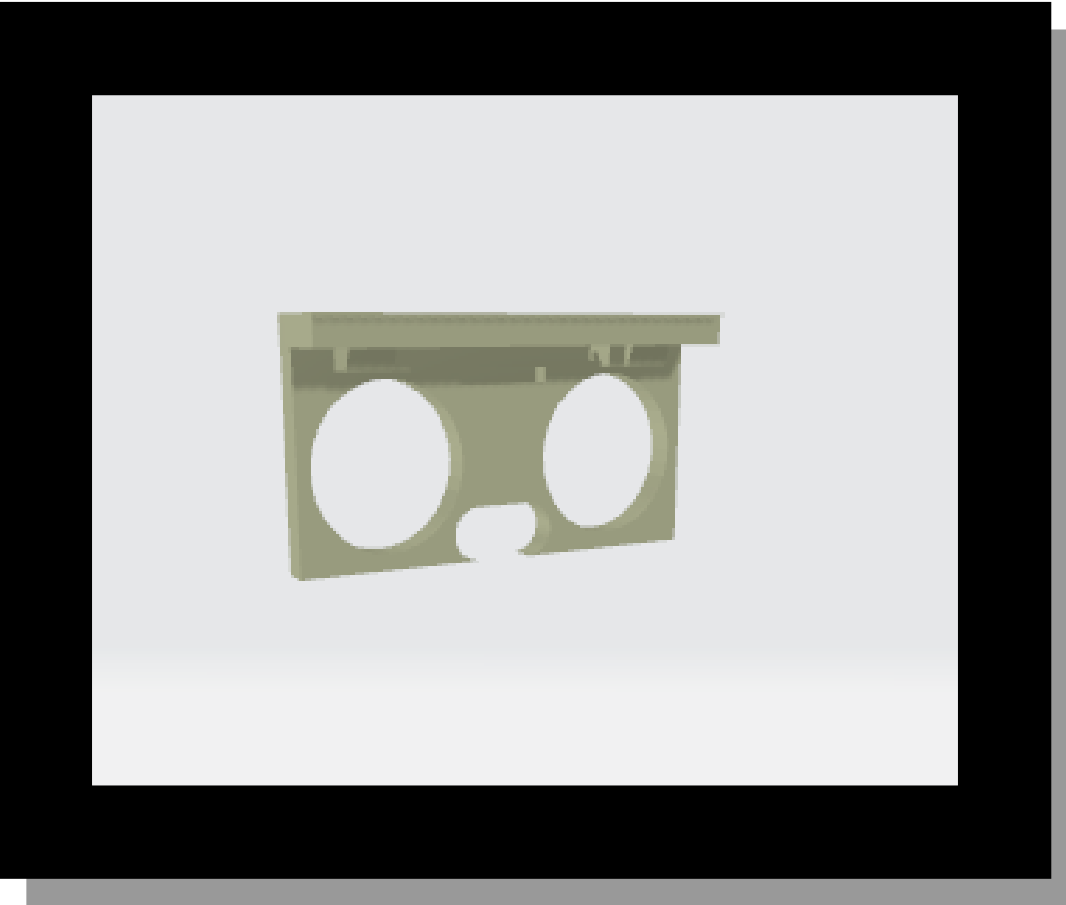

3D printer is used to print a holder
for the Arduino microcontroller

Design and print camera and ultrasonic holder

3D printer is used to print a holder for the camera. and also, for front, left, and right ultrasonic sensors.

DESIGN AND PRINT ARDUINO MEGA HOLDER

3D printer is used to print a holder for the Arduino microcontroller
